

House Resolution 1999

By: Representative Jenkins of the 8th

A RESOLUTION

1 Honoring the memory of Micajah Clark Dyer, self-taught inventor of the North Georgia
2 mountains; and for other purposes.

3 WHEREAS, on a day in the 1880s at least 15 years before the Wright Brothers' famous flight
4 at Kitty Hawk, North Carolina, Micajah Clark Dyer rode his "apparatus for navigating the air"
5 — the term airplane would not be coined for decades — down a slip on Rattlesnake Mountain
6 in Union County, Georgia, and flew low over a meadow on his farm in the Choestoe
7 community near Blairsville; and

8 WHEREAS, Mr. Dyer, who was born in South Carolina on July 23, 1822, and who farmed in
9 Union County, Georgia, to support his large family, received his only formal education in a one
10 room school, but despite this limitation developed a reputation as a true genius because of his
11 many inventions; and

12 WHEREAS, most of Mr. Dyer's inventions have been lost in the veil of time, but it is known
13 that he equipped his house with running water, built an efficient water-powered grist mill, and
14 invented a "perpetual motion" machine that could power devices, but his most famous invention
15 was his flying machine, for which he was awarded a patent in September, 1874, and which he
16 continued to improve and refine until his death on January 26, 1891; and

17 WHEREAS, stories of his flying machine were kept alive through Dyer family oral tradition
18 until 2004, when, thanks to the modern invention of the Internet, family members were able
19 to identify the 1874 patent and obtain a copy, proof that the machine had, in fact, been built and
20 that sophisticated plans had been filed with the United States patent office, although the flight
21 from Rattlesnake Mountain over the meadow remains unverified local lore; and

22 WHEREAS, although the flying machine invented in the remote North Georgia mountains
23 never made it into the history books, family history indicates that Mr. Dyer's widow, Morena
24 Owenby Dyer, sold the machine and plans to the Redwine Brothers in Atlanta, who, in turn, sold

1 them to the Wright Brothers of Ohio, so it is probable that Micajah Clark Dyer did, indirectly,
2 contribute to the first human flight.

3 NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES that the
4 members of this body honor the memory of Micajah Clark Dyer, self-taught inventor and
5 contributor to successful flight.

6 BE IT FURTHER RESOLVED that the Clerk of the House of Representatives is authorized and
7 directed to transmit an appropriate copy of this resolution to the family of Micajah Clark Dyer.
